Bangalore, Karnataka 560073 | 9480957145 | ruchitharuc@gmail.com | [linkedin.com/in/ruchithar](https://www.linkedin.com/in/ruchithar) | github.com/ruchitha460-sys

EDUCATION

St. Paul's College, Bangalore

Bachelor of Computer Applications | 2023 - 2026

CGPA: 8/10 | Relevant Coursework: OOPs, Data Structures, Operating Systems, Data Analytics, Software Testing, Machine Learning, AI

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

AI/GenAI: Generative AI, LLM, Prompt Engineering, RAG, LangChain, LangGraph, Hugging Face, Vector Database (FAISS)

Back-end: FastAPI, Flask, MongoDB, REST API

Front-end: HTML, CSS, Streamlit

Tools & Platforms: GitHub, VS Code, Postman, Azure, Excel, Power BI

AI Tools: ChatGPT, Claude, Cursor IDE

PROJECTS

AI Job Search Multi-Agent System | Python, LangChain, LangGraph, FAISS, SQLite, Streamlit, APScheduler, GitHub Actions

- Built a multi-agent AI system using LangGraph to orchestrate specialized agents across a source → filter → match → explain pipeline, autonomously fetching and ranking job postings from Adzuna, Greenhouse, and Lever against a resume.
- Developed a RAG-based semantic matching agent using sentence embeddings and FAISS vector search, with a separate filtering agent applying NLP-based experience-level matching to eliminate seniority mismatches.
- Added an LLMops layer for production observability — structured run logging, a live monitoring dashboard, and automated CI smoke tests — and deployed live on Streamlit Cloud with CI/CD via GitHub.

Guardrails & Evaluation Toolkit for LLM Applications | Python, FastAPI, MongoDB, HTML/CSS/JS

- Built a reusable guardrails framework with input and output safety checks — PII detection, prompt injection, toxicity filtering, hallucination detection, and format validation — pluggable into any LLM application.
- Designed an evaluation harness with labeled test cases to measure guardrail precision, recall, and false-positive rate, achieving 100% accuracy on the test suite.
- Deployed a FastAPI backend (Render) integrating the pipeline into a RAG-style demo chatbot with MongoDB logging, paired with a static frontend (Vercel) visualizing live guardrail checks.

Veriscope – AI Research Platform | Python, Streamlit, LangChain, HuggingFace, FAISS

- Built a multi-tool AI research platform with six integrated modules — Document Q&A, Fake News Detector, Plagiarism Checker, AI Content Detector, Language Translator and URL Trust Checker — powered by GPT-4o-mini via OpenRouter.
- Developed a RAG-based document Q&A system for context-aware retrieval from PDFs and URLs, and built the embedding and vector search pipeline using HuggingFace embeddings and FAISS, tuning chunking to improve retrieval accuracy.
- Designed a responsive Streamlit interface for real-time interaction across all six tools, with secure API key handling and session-based state management.

Spotify Music Streaming Dashboard | Power BI

- Developed an interactive Power BI dashboard analyzing Spotify songs, artists and streaming trends. Implemented filters and slicers for dynamic insights and performed data transformation using Power Query.

PROFESSIONAL EXPERIENCE

AI/ML Intern - Edutantr

July 2026 - Present

- Working on AI/ML concepts including LLMs, RAG, AI agents, and MCP as part of the internship curriculum, while applying data analysis and visualization techniques using Pandas, NumPy, and Matplotlib in project work.

Cyber Security Intern - IBM

April 2026 - June 2026

- Performed network scanning and vulnerability assessment using Nmap, Metasploit, and Wireshark, including command-line operations and system navigation on Kali Linux while exploring bug bounty practices for web security testing.

Software Testing Intern - CODTECH IT Solutions

Feb 2026 - March 2026

- Designed and executed automated test scripts using Selenium WebDriver (Python) and performed REST API testing via Postman, along with load testing using Gatling to simulate virtual users and evaluate system performance under traffic.

CERTIFICATIONS & AWARDS

Microsoft Azure Fundamentals (AZ-900) | Microsoft, 2025

Cyber Security & Ethical Hacking Workshop | NCIIPC (Govt. of India), 2024

Anthropic Claude API Course | Anthropic - Prompt Engineering, MCP, RAG, 2026
