

RUCHITHA R

Bangalore, Karnataka 560073 | 9480957145 | ruchitharuc@gmail.com | www.linkedin.com/in/ruchitharr | github.com/rruchitha460-sys

EDUCATION

St. Paul's College, Bangalore

Bachelor of Computer Applications | 2023 - 2026

CGPA: 8/10 | Relevant Coursework: OOPs, Data Structures, Operating Systems, Data Analytics, Software Testing, Machine Learning

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Front-end: HTML, CSS, Streamlit

Back-end: FastAPI, Flask, MongoDB

Tools & Platforms: GitHub, VS Code, Postman, Excel, Power BI

AI Tools: ChatGPT, Claude, Cursor IDE

PROFESSIONAL EXPERIENCE

Cyber Security Intern - IBM

March 2026 - May 2026

- Worked with Kali Linux to perform command-line operations, file management and system navigation.
- Performed network scanning and information gathering using tools like Nmap, WHOIS and Wireshark to identify hosts and services.
- Conducted vulnerability scanning and basic exploitation using Nmap, Metasploit and explored bug bounty practices for web security testing.

Software Testing Intern - CODTECH IT Solutions

Feb 2026 - March 2026

- Designed and executed automated test scripts using Selenium WebDriver (Python) to validate web application workflows such as login and navigation.
- Performed REST API testing using Postman by creating and validating GET and POST requests, verifying status code, authentication and JSON responses.
- Implemented load testing using Gatling to simulate virtual users, measure response time, throughput and evaluate system performance under simulated traffic.

PROJECTS

Veriscope – AI Research Platform | Python, Streamlit, LangChain, HuggingFace, FAISS

- Built a multi-tool AI research platform with six integrated modules — Document Q&A, Fake News Detector, Plagiarism Checker, AI Content Detector, Language Translator and URL Trust Checker — powered by GPT-4o-mini via OpenRouter.
- Developed a RAG-based document Q&A system for context-aware retrieval from PDFs and URLs, and built the embedding and vector search pipeline using HuggingFace embeddings and FAISS, tuning chunking to improve retrieval accuracy.
- Designed a responsive Streamlit interface for real-time interaction across all six tools, with secure API key handling and session-based state management.

AI Job Searcher Agent | Python, LangChain, FAISS, SQLite, Streamlit, OpenRouter, APScheduler

- Built an end-to-end AI agent that autonomously fetches job postings from multiple sources (Adzuna API, Greenhouse and Lever ATS platforms) and semantically matches them to a resume using sentence embeddings and FAISS vector search.
- Implemented experience-level filtering via NLP pattern matching to eliminate seniority-mismatched results, and integrated an LLM to generate plain-language match explanations and personalized resume improvement suggestions.
- Automated daily job discovery with APScheduler and deployed a live interactive web interface on Streamlit Cloud with CI/CD via GitHub.

Spotify Music Streaming Dashboard | Power BI

- Developed an interactive Power BI dashboard analyzing Spotify songs, artists and streaming trends. Implemented filters and slicers for dynamic insights and performed data transformation using Power Query.

CERTIFICATIONS & AWARDS

Microsoft Azure Fundamentals (AZ-900) | Microsoft, 2025

Cyber Security & Ethical Hacking Workshop | NCIIPC (Govt. of India), 2024

Anthropic Claude API Course | Anthropic - Prompt Engineering, MCP, RAG
